Research submissions should conform, where practical, to the Publication Manual of the American Psychological Association (APA, 6th edition); however, the Journal is flexible in its format and encourages creativity and innovation.

Submission of a manuscript implies commitment to publish in the Journal. Submission to JAED also implies that the manuscript has not been published elsewhere, nor is it under consideration by another journal. Authors who are in doubt about what constitutes prior publication should consult the editor.

The Journal features academic articles, examples from economic practitioners, book reviews and the state of the Aboriginal economy.

Learning from Experience from practitioners, academics, consultants and executives include interpreted case studies, evaluation and commentary on popular and current approaches and tools of Aboriginal economic development, advocacy of particular approaches and solutions, successful or failed efforts, and the identification of important economic development problems that are in need of solutions.

Lessons from Research from academics features scholarly inquiry, debate and commentary on how we frame, perceive, interpret, research and contribute to the field of Aboriginal economic development.

The State of the Aboriginal Economy will feature current views on the evolving state of the Aboriginal economy and responses to changes in the global economy, corporate activity, government policy - for example the Federal Framework on Aboriginal Economic Development, or the social economy.

Reviews of Current Books and Literature features recent literature exploring aspects of economic development relevant to Aboriginal peoples and community development.

We believe such submissions will be particularly valuable, and it is our objective to publish as many as possible, if not in this issue then in subsequent issues of the JAED and/or in Cando Connect Magazine. We want to know what people are doing, what is working, what is not working, and why.
